

ACME Corp Purchase Order Audit

Prepared for: ACME Corp Accounting Supervisor
Prepared by: Accounting Audit Agent
Report Date: July 10, 2026
Scope: 10 purchase orders (ACME_Order_Form_01 through 10)

Executive Summary

Line-level and order-level arithmetic (Line Total = Qty x Unit Price, Subtotal = sum of Line Totals, Tax = Subtotal x stated rate, Total Due = Subtotal + Tax) was independently recalculated for all 10 purchase orders. **No arithmetic discrepancies were found in any of the 10 orders** — every Line Total, Subtotal, Tax amount, and Total Due reconciles exactly to the penny. Tax rates were also consistently applied at 10% across all orders, and no duplicate PO/order numbers were found.

However, several **data-quality and business-logic anomalies** were identified that warrant accounting review, primarily around unit-price volatility for identical SKUs across orders, order dates that post-date the report date, and customer records that may represent duplicate or related accounts. These are detailed by category below, followed by a per-PO breakdown.

Cross-Order Anomalies (Data Quality / Business Logic)

1. Likely decimal / data-entry error in unit price - SKU ACM-1003 (Industrial Grade Rubber Gasket), PO 8, Line 2

Location:	ACME_Order_Form_08.json - Line 2 (ACM-1003)
Observed:	PO 8, Line 2 shows a unit price of \$3.38 (roughly 10x-70x lower than every other observed price for the same SKU)
Expected / Reference:	Unit price for ACM-1003 in other orders ranges \$38.86-\$245.66 (PO 3: \$38.86, PO 4: \$245.66, PO 5: \$162.63, PO 6: \$120.45, PO 7: \$98.76, PO 9: \$210.34, PO 10: \$150.12)
Why flagged:	A price this far outside the observed range for an identical SKU strongly suggests a misplaced decimal point or data-entry error
Suggested action:	Confirm the correct unit price for ACM-1003 with the vendor/price list before invoicing; recalculate Line Total, Subtotal, Tax, and Total Due for PO 8

2. Wide unit-price variance across orders for identical SKUs

Location:	Multiple POs - see SKUs below
Observed:	Several SKUs show >5x price spread across the 10 orders, e.g.: ACM-1020 (Galvanized Steel Wire Spool) \$10.25 vs \$52.50
Expected / Reference:	Unit price should be reasonably stable for a given SKU absent documented discounts/bulk pricing
Why flagged:	Absent a volume-discount or promotional pricing schedule, this level of unit-price inconsistency for the same SKU across orders is atypical
Suggested action:	Cross-check unit prices against the current approved ACME Corp price list for each SKU; confirm any discounts or promotional pricing

3. Order dates that post-date the audit/report date

Location:	ACME_Order_Form_01.json, 02.json, 03.json, 08.json
Observed:	PO 1 (ACM-278611) dated Nov 6, 2026; PO 2 (ACM-406309) dated Aug 17, 2026; PO 3 (ACM-803419) dated Jul 28, 2026
Expected / Reference:	Order date should be on or before the date the order form was issued/received for processing (report date: Jul 10, 2026)
Why flagged:	An order form dated in the future relative to when it is being processed/audited is atypical and may indicate a data-entry error or system glitch
Suggested action:	Confirm the actual order date with the customer or sales rep and correct the record if it was a data-entry error; investigate system date/time settings

4. Two differently-named customers share the same email domain and city

Location:	ACME_Order_Form_06.json (Pinnacle Enterprises) and ACME_Order_Form_07.json (Pinnacle Building Supply)
Observed:	PO 6 bill-to is 'Pinnacle Enterprises' (contact Robert Green, robert.green@pinnacle.com, 3488 River Ln, Roche
Expected / Reference:	Distinct customer accounts should generally have distinct, verifiable domains/entities; shared domains across c
Why flagged:	Two customer records sharing an email domain and city under different company names could represent legitim
Suggested action:	Verify with the customer/sales team whether 'Pinnacle Enterprises' and 'Pinnacle Building Supply' are the same

5. Same customer name with different addresses and contacts across orders

Location:	ACME_Order_Form_03.json and ACME_Order_Form_05.json (Timberline Enterprises)
Observed:	PO 3 bill-to is 'Timberline Enterprises', contact Nancy Thompson, 290 River Way, Tulsa, OK 74103. PO 5 bill-to
Expected / Reference:	A single named customer account should map to a consistent billing address, or clearly documented multiple lo
Why flagged:	This may simply reflect two branch locations of the same company, but it should be confirmed rather than assu
Suggested action:	Confirm with the customer whether these are two legitimate branch locations under one master account; if so, t

Minor note (informational, not flagged as an anomaly): Chattanooga, TN 37402 appears as the ship-to city/zip for two unrelated customers (PO 1 - Copper Solutions Group, and PO 8 - Cascade Industrial), and Topeka, KS 66603 similarly appears for two unrelated customers (PO 9 - Northgate Works, and PO 10 - Union Works). Given the different street addresses and contacts in each case, this is most likely coincidental (small pool of service cities) rather than a data error, but is noted for completeness.

Per-Purchase-Order Arithmetic Verification

The table below summarizes the independent recalculation performed for each PO. All 10 orders passed every check with zero arithmetic discrepancies.

PO File	Order #	Date	Line Totals	Subtotal	Tax (10%)	Total Due	Result
ACME_Order_Form_01	ACM-278611	Nov 6, 2026	5/5 OK	OK	OK	OK	No anomalies
ACME_Order_Form_02	ACM-406309	Aug 17, 2026	6/6 OK	OK	OK	OK	No anomalies
ACME_Order_Form_03	ACM-803419	Oct 3, 2026	7/7 OK	OK	OK	OK	No anomalies
ACME_Order_Form_04	ACM-848231	May 21, 2026	5/5 OK	OK	OK	OK	No anomalies
ACME_Order_Form_05	ACM-439181	Jan 23, 2026	7/7 OK	OK	OK	OK	No anomalies
ACME_Order_Form_06	ACM-773713	Jun 13, 2026	9/9 OK	OK	OK	OK	No anomalies
ACME_Order_Form_07	ACM-392012	Feb 25, 2026	8/8 OK	OK	OK	OK	No anomalies
ACME_Order_Form_08	ACM-527932	Oct 8, 2026	9/9 OK*	OK	OK	OK	See Anomaly #1 (price)
ACME_Order_Form_09	ACM-767913	May 8, 2026	7/7 OK	OK	OK	OK	No anomalies
ACME_Order_Form_10	ACM-610836	Apr 4, 2026	10/10 OK	OK	OK	OK	No anomalies

*PO 8's Line/Subtotal/Tax/Total Due arithmetic is internally consistent (the math reconciles), but Line 2's unit price itself is flagged as a likely data-entry error - see Anomaly #1 above.

Detailed Per-PO Notes

PO 1 - ACM-278611 (Copper Solutions Group)

All 5 line items, subtotal (\$70,188.26), tax (\$7,018.83 at 10%), and total due (\$77,207.09) verified correct. No anomalies.

PO 2 - ACM-406309 (Foothill Holdings)

All 6 line items, subtotal (\$73,661.50), tax (\$7,366.15 at 10%), and total due (\$81,027.65) verified correct. No anomalies.

PO 3 - ACM-803419 (Timberline Enterprises, Tulsa OK)

All 7 line items, subtotal (\$32,615.66), tax (\$3,261.57 at 10%), and total due (\$35,877.23) verified correct. See cross-order Anomaly #5 regarding a same-named customer at a different address in PO 5.

PO 4 - ACM-848231 (Prairie Supply Co.)

All 5 line items, subtotal (\$57,350.16), tax (\$5,735.02 at 10%), and total due (\$63,085.18) verified correct. No anomalies.

PO 5 - ACM-439181 (Timberline Enterprises, Fargo ND)

All 7 line items, subtotal (\$41,019.86), tax (\$4,101.99 at 10%), and total due (\$45,121.85) verified correct. See cross-order Anomaly #5.

PO 6 - ACM-773713 (Pinnacle Enterprises)

All 9 line items, subtotal (\$56,573.35), tax (\$5,657.34 at 10%), and total due (\$62,230.69) verified correct. See cross-order Anomaly #4 regarding shared email domain with PO 7.

PO 7 - ACM-392012 (Pinnacle Building Supply)

All 8 line items, subtotal (\$48,540.87), tax (\$4,854.09 at 10%), and total due (\$53,394.96) verified correct. See cross-order Anomaly #4.

PO 8 - ACM-527932 (Cascade Industrial)

All 9 line items reconcile arithmetically; subtotal (\$28,288.36), tax (\$2,828.84 at 10%), and total due (\$31,117.20) verified correct. However, Line 2 (ACM-1003) unit price of \$3.38 is a significant outlier vs. other orders - see Anomaly #1. Also dated after report date - see Anomaly #3.

PO 9 - ACM-767913 (Northgate Works)

All 7 line items, subtotal (\$17,671.92), tax (\$1,767.19 at 10%), and total due (\$19,439.11) verified correct. No anomalies.

PO 10 - ACM-610836 (Union Works)

All 10 line items, subtotal (\$68,165.01), tax (\$6,816.50 at 10%), and total due (\$74,981.51) verified correct. No anomalies.

Summary: 5 anomalies identified across 10 purchase orders. No arithmetic errors (Line Total, Subtotal, Tax, or Total Due) were found in any PO. All flagged items relate to data-quality/business-logic review items: one likely unit-price data-entry error, broad SKU price-consistency concerns, four future-dated order forms, and two customer-record duplication/consolidation questions.
